Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	2 Marks

Problem – Solution Fit Template:

The Problem-Solution Fit simply means that you have found a problem with your customer and that the solution you have realized for it actually solves the customer's problem. It helps entrepreneurs, marketers and corporate innovators identify behavioral patterns and recognize what would work and why.

Purpose:

- ☐ Streamline the standard laptop procurement process by automating request approval, task creation, and assignment.
- ☐ Reduce manual intervention and processing delays by automatically generating Hardware configuration tasks after approval.
- ☐ Improve task allocation and resource utilisation by assigning configuration work to the appropriate Hardware team.
- ☐ Reduce errors and overlooked tasks by creating a consistent and automated workflow for standard laptop requests.
- ☐ Improve employee satisfaction by reducing waiting time and providing a faster and smoother laptop-request experience.

Template:

1. CUSTOMER SEGMENT(S) IT procurement team, Hardware team, and employees requesting standard laptops.	6. CUSTOMER CONSTRAINTS Limited IT staff time, manual processing, approval requirements, and correct Hardware assignment.	5. AVAILABLE SOLUTIONS Manual request processing and manual creation/assignment of Hardware configuration tasks.
2. JOBS-TO-BE-DONE / PROBLEMS Process standard laptop requests efficiently, obtain approvals, create configuration tasks, and assign them to Hardware.	9. PROBLEM ROOT CAUSE Manual steps between request approval and Hardware task assignment can create delays and dependency on staff intervention.	7. BEHAVIOUR Employees submit Service Catalog requests; IT processes approvals; Hardware configures the requested laptop.
3. TRIGGERS A Standard Laptop request is submitted and receives the required approval.	10. YOUR SOLUTION ServiceNow Flow Designer automatically creates a Catalog Task for an approved Standard	8. CHANNELS OF BEHAVIOUR ONLINE: Service Catalog, Requested Item records,

4. EMOTIONS: BEFORE / AFTER Before: waiting and uncertainty for users; repetitive manual work for IT staff. After: faster assignment, clearer progress, and smoother request experience.	Laptop request and assigns it to the Hardware group.	approvals, and Flow Designer. OFFLINE: Hardware team configures and prepares the device.

Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	2 Marks

Proposed Solution Template:

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	The standard laptop procurement process involves manual steps that can cause delays, increase IT staff workload, and result in configuration tasks being overlooked or assigned late.
2.	Idea / Solution description	Use ServiceNow Flow Designer to automate the procurement workflow. After a Standard Laptop request is approved, the flow automatically creates a Catalog Task and assigns it to the Hardware group for configuration.
3.	Novelty / Uniqueness	The solution automatically connects the approval stage with Hardware task creation and assignment. This reduces manual intervention and ensures that configuration work is initiated consistently after approval.
4.	Social Impact / Customer Satisfaction	The solution reduces employee waiting time, improves request processing, and provides a smoother laptop-request experience. It also reduces repetitive work for IT staff and improves task visibility.

5.	Business Model (Revenue Model)	The solution creates operational savings by reducing manual processing time and improving IT resource utilisation. It can help organisations handle procurement requests more efficiently without requiring additional manual effort.
6.	Scalability of the Solution	The workflow can be extended to other standard IT hardware and service requests. Similar automated approval, task creation, and assignment processes can be configured for desktops, monitors, accessories, and other IT services.

Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	4 Marks

Solution Architecture

The solution uses ServiceNow Service Catalog and Flow Designer to automate the standard laptop procurement and configuration process. A user submits a Standard Laptop request through the Service Catalog. After the request is approved, Flow Designer is triggered and automatically creates a Catalog Task, updates the task details, and assigns it to the Hardware group for configuration. This reduces manual intervention, improves task allocation, and helps ensure timely laptop configuration.
